TOWARDS ACADEMIC IMPROVEMENT OF GOVERNMENT SCHOOLS

H PAU ZA CHIN, MES

President, Churachandpur District Education Employees Union(CDEEU); Ex. General Secretary, CDTA

As invited suggestions from one and all by the Hon'ble Education Minister for the Academic Improvement of Govt. schools in Manipur, It's a great privilege for me to be here to highlight my humble suggestions, on behalf of the Teachers' Association, Churachandpur, for the academic improvement of govt. schools in Manipur as here under:-

Government schools in Manipur are the butt of many jokes and countless criticisms. The evident disappointment of the critics is not totally unfounded. The criticized have to take all this in the right spirit so that the problems faced by government schools will get a chance to be recognized and solved. I offer some suggestions, on behalf of the CDTA for solution of the problems thereof.

1. **UNIVERSALISATION OF SCHOOL CURRICULUM:** There has been, at the most, some half-hearted attempts for introducing universalization of school curriculum in Manipur. The books published by BSEM have a big advantage; they are cheaper and over the years content has improved somewhat, though the print quality is below mark. What, however, is important to note is that both parent and child give priority to the total quality of books and not only how priced they are. The feeling prevalent among parents is a little more expensive is a sounder investment. Another very important drawback to note is, the perpetual short supply. Often there aren't enough books in the market even well into the academic year! Nevertheless, many parents and educationists feel the need for universalization of curriculum as is evident their preference for NCERT publications, for high standard, uniformity and assurance of supply.

2. **TEACHERS' PROBLEM:** The problems of teachers, when aired, are numerous. I would like to drastically cut short all the airing of problems by saying that - "Teachers do not have problems as long as they are paid!" This points to the fact that (a) the teachers, more often than not, are the problem. They become the problem when they don't go to their places of posting. (b) They create further problems when their substitutes do not teach their pupils. (c) Teachers become still bigger problems if they don't know how to teach, even though they are paid fairly well and in spite of the fact that the government especially through the SSA and DIET center have made numerous attempts to give training to Primary and Upper primary in-services Teachers. Looking at things like HSLC Results, cannot help wondering if this huge government spending would get a good return.

3. **NEED FOR A RE-THINK ON TEACHERS TRAINING:** It is significant to note that medical and technical staff in particular, have to undergo training and completion of their course of study before they can join the services. On the contrary, govt. in-service teachers have to complete certain numbers of years of service before they are allowed to "apply" for professional course. It is desirous that in order to achieve quality education quality teaching is the first requisite component in the teacher. Hence, needless to mention of in-services teachers, there is urgent need for a re-think on Pre-service Teacher Training. This actually should be a pre-requisite for all teacher-aspirants.

4. **TOWARDS QUALITY EDUCATION:** It is a common knowledge that private schools function smoothly, and do well. This is to a great extent because they have full power to control their staff, both teaching and non-teaching. However, as such full authority is not given to government schools, in the present context, it is suggested that (a) any and every teacher appointment be made only against vacancies in a particular school, wherever it is i.e. new teachers are appointed to a vacant post. (b) That, thereafter the initial/first posting should last for 15 years. Subsequently, the 2nd posting should be for 10 years and the last posting for 5+years leading to retirement. (c) Therefore, general transfer can apply only to those who have completed 15/10/5 years in an institution. There should be no other transfer and posting possibilities. This one step would ensure 15 or 10 or 5+ years of regular services in the place of posting without the least interference by high officials and politicians. (d) Such longer tenures would lead to better utilization of in-services training efforts because accountability becomes factored in. (e) Consequently, the school managing committee and the heads of school would be default become empowered and so be able to plan long term. (f) It thus becomes logical to select and appoint new teachers only after advertising for vacancies in specific schools. This means that the applicant not only knows her/his place of posting if he/she gets selected, but that they have to be there for a minimum of 15 years period.

5. **TEACHER'S QUARTER:** Once teachers have to be in their place of posting for 15/10/5+ years the need for teacher quarters would automatically arise. If there is any financial crunch, innovative idea like quarter co-ordination through a Villager-School-Teacher-Partnership (VSTP) could be started and be guaranteed by the School Managing Committee and Headmaster. VSTP would mean a villager could construct a rentable home with rental guaranteed at sources from the pay of a teacher for 15 years or

so. This would lead to village capacity building and village economic boosting through re-channeling of existing resources.

6. **EDUCATION DEPARTMENT BE TREATED DIFFERENTLY:** The government should treat its education department somewhat differently from other departments, even though teachers are government servants. One big reason for this is that the normal office-goer who is unable to complete his work in Office, can do much or all of it at home i.e. he can take his file home and work in his own sweet time. This is not the case with the teaching community who have just a few fixed hours every school day to be face to face with his students. In that fixed time he has to mould his students in the ways of real or true education and all-round development, as taught in DIET & PGT colleges etc. Further, the relationship between teacher and the taught needs to be carefully built up over a period of time. Time that needs consistency, regularity and so on everyday of the year for many years. Hence, unlike the other govt. departments/servants, even the present government holiday lists is not conducive to a child's continuous education. This suggests that schools and colleges need a different holiday list. Such list should be prepared locally by the Managing Committee and parents of the village/area where the school is located. In fact, even the working hours need follow Imphal's official working hours i.e. hill schools in summer could start at 8am and at 2 pm. The suggested local adjustments should be possible because education is a vacation department. The school-centered holiday list would also benefit minority-based run institutions and boarding/residential schools.

As for the often referred to education disruptive situation created by teachers being frequently used by the government for census, election duty and other enumeration duties and so on, my take on this is that these happen but once in 4/5/10 years, and so with a little more thought given to the matter it is not that a big problem. The suggestion is that the better 1/3rd of the teachers of the institution (subject wise) should remain unaffected by the national duty so that classes (or sports etc) can still be regularly conducted. However, as a pre-condition for such adjustments of national duty, staff strength is crucial, hence my next point-

7. **URGENT NEED FOR REAL TEACHER RATIONALISATION:** The distribution of teachers in govt. schools is downright unfair in spite of a decade of talking about rationalization. The fact is that some schools are overstaffed while some are horribly under-staffed! In general while the high schools in the District Headquarters or in the valley have 30+50 teachers, the high schools in the remote hill areas have 5-10 teachers at the most! Jr. High Schools and JB Schools fare no better. This type of lopsided distribution has been going on for so long that many hill schools are now defunct. Most importantly, subject teachers for Science, Math, Hindi and Manipuri are hardly seen in the remote areas anymore. Frankly speaking, it may be mentioned that for a government servant to be posted in the interior hill areas the posting is taken as a punishment, as if they are being sent to hell! Hence the wisdom of the earlier suggestion, that all appointments be made after advertising the vacancy/vacancies to be filled up i.e. I repeat, the teacher-job-applicant is applying for vacancy in 'X' and so knows he/she is going to serve in 'X' if he/she gets selected! (And, very possibly, the rumored going rate for fresh appointments would plummet, or be done away with for 60-70% of teacher posts!)

8. **TIMELY CONDUCT OF DPC FOR IN-SERVICE TEACHERS:** One factor that has led to the ruin of education in Manipur is that most of the DI/AI and Headmaster are 'in-charge' only. If the government is serious about improving education it must conduct DPC once or twice a year for the promotion of eligible senior graduate teachers to class II post which are lying vacant in large numbers due to the retirement of many senior employees in the department each year. Regular DPCs will certainly enthuse and motivate the senior graduate teachers. I say this as Manipur's school education is in dire straits because of ad-hocism that the in-charge system breeds.

In conclusion, and to cut short a long story short, the continuing decline of school education in Manipur can be checked if the government treats the education Department differently from its other Departments, if it wants to make difference. Further dilly-dallying and neglect, by going on in the same old way, will only lead to total collapse of school education in Manipur.

(This paper was presented by the writer on behalf of the Association while he was the General Secretary of CCPur Dist. Teachers' Assn. (CDTA), during a seminar held between April 24&26, 2001, jointly organized by the Edn. Directorate(S) & SCERT Imphal on the topic 'Suggestions for Academic Improvement of Govt. schools in Manipur', initiated by the then Hon'ble Education Minister (late) T. Mani Singh, at state Guest House, Babupara, Imphal)
